-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 2-9 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2-4, 6-9, and 32-37 are rejected under 35 U.S.C. 103(a) as being anticipated by Weber et al. WO 00/35401.

As to claims 2-4, 6-9, 32-34, Weber discloses a disposable absorbent article capable of being worn about the lower torso of a wearer including a body-facing surface 28, a backsheet 40 having a garment-facing surface and body-facing surface; a first waist region 22 with a first end edge; a second waist region 24 with a second end edge; and a crotch region 26 interposed therebetween (Figure 1). The article further comprises at least one externally visible serviceable indicium 60 disposed on portions proximate the longitudinal side edges in at least the crotch region (figure 1) and at least one externally visible serviceable indicium 95 proximate the first and second end edges, which forms a contoured pattern that distinguishes the portions of the articles including

the externally visible serviceable indicia from a portion proximate an intersection of the longitudinal and transverse axes (Figure 1). The article further comprises core 44 and ear panel 34, where a portion of the ear panels includes one externally visible serviceable indicium 93. The article further includes a fastening system 83,85 as claimed. As to claim 17, the presence of the gathers 30 (Figures 1 and 3) create an elastically foreshortened topsheet, at least in the areas of the gathers, as broadly as claimed.

Weber does not disclose the externally visible serviceable indicium proximate the longitudinal side edges and the externally visible serviceable indicium proximate the second end edge from a contoured pattern that distinguishes the first waist region from the second waist region. However, Web discloses the outer cover graphics are used as educational and motivational tools to advance the toilet training process and the outer cover graphic may cooperate with a hidden to create a picture when the fastening component is disengaged (page 6, lines 3-11). In order to use the outer cover graphic as an education tool, one having ordinary skill in the art would be motivated to print the graphic on the front waist region of the article rather than the rear waist region. Additionally, a graphic used to complete a picture with a fastening component would also be present in the front waist region. An outer cover graphic externally visible on the front waist regions distinguishes the first waist region from the second waist region.

As to claims 35-37, Weber discloses instructional serviceable indicia (page 5, lines 1-16).

Allowable Subject Matter

4. Claims 23 and 28-31 are allowed.

1. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
